SRPS- Way towards making difference in the field of Education through Research

It was pleasure to judge SRPS- Student Research Project Scheme at Ashoka International Centre for Educational Studies and Research on 31st March 2022.

When the Management is Visionary and team is efficient then we get excellent outcome in the education field which I experienced during presentations of researcher students.

Dr. Gujrathi Sir and Principal Dr. Santosh Rukari with their dynamic team are working towards excellence and giving better and better learning experiences to the students, Teacher training course makes all round development of student and when research culture is developed among future teachers that is the best education we can provide. This college is really giving their best to create future teachers in right way. The presentations of all students were excellent with confidence and well developed research skills. All students could satisfactorily answer all the questions by judges and their dedication and commitment was visible in their presentations.

I congratulate the Management, Principal, Staff and all students for developing this kind of research culture and making education field more vibrant and meaningful. These researchers can be sent to all stakeholders of education and with small efforts all these students can create huge difference.

Thanking you,

Dr. Sandhya M. Khedekar
Principal
Gokhale Education Society's College Education
